PROFILE

Motivated Software Engineering undergraduate with hands-on experience in cloud computing, DevOps, Kubernetes, microservices, and Linux system administration. KCNA certified, Google Cloud Certified Professional Cloud DevOps Engineer, AWS Certified Cloud Practitioner and Associate Microsoft Student Ambassador, with practical experience in infrastructure automation, CI/CD pipelines, system deployment, monitoring, and cloud optimization. Eager to contribute to the open-source community and seeking opportunities in Cloud Engineering, DevOps, or SRE.

EDUCATION

University of Sri Jayewardenepura Sri Lanka
B.Comp. (Hons.) in Software Engineering 2023 – Present

- GPA after 6th Semester: 3.71 / 4.00

Esoft Metro Campus, Galle Sri Lanka
Pearson Assured Diploma in Information Technology May 2022 - May 2023

Richmond College, Galle Sri Lanka
G.C.E. Advanced Level – Mathematics Stream Dec 2021

CERTIFICATIONS

- **Kubernetes and Cloud Native Associate (KCNA)**: Issued July 2026
- **Google Cloud Certified - Professional Cloud DevOps Engineer**: Issued July 2026
- **AWS Certified Cloud Practitioner (CLF-C02)**: Issued Jan 2026
- **FinOps Certified Practitioner**: Issued Jan 2026

PROJECTS

- **Production-Grade GitOps Microservices Deployment on AWS EKS** [GitHub](#) [Demo](#)

AWS EKS | Terraform | Kubernetes | Docker | GitHub Actions | ArgoCD | GHCR | Gateway API | Prometheus | Grafana | ELK Stack

Built a GitOps-driven Online Boutique microservices deployment on AWS EKS with automated CI/CD, secure traffic exposure, monitoring, logging, and Slack alerts.

- **GitOps CI/CD Platform on AWS EKS** [GitHub](#) [Demo](#)

Terraform | AWS EKS | Kubernetes | Docker | Amazon ECR | GitHub Actions | Helm | ArgoCD | Maven | SonarQube | Slack

Designed and implemented a production-grade GitOps CI/CD platform with separate infrastructure and application pipelines, automating AWS EKS provisioning with Terraform and Kubernetes deployments using GitHub Actions, Helm, Argo CD, Docker, and Amazon ECR.

- **Full Monitoring and Observability Stack from Scratch** [Demo](#)

AWS EC2 | Prometheus | Grafana | Loki | Node Exporter | Alloy | Apache2 | Linux

Deployed a monitoring and logging stack on AWS EC2 using Prometheus, Grafana, Loki, Node Exporter, and Alloy for metrics, logs, dashboards, and troubleshooting.

- **Serverless AWS Cost Optimization Tool** [GitHub](#) [Demo](#)

AWS Lambda | CloudWatch | EC2 | EBS | DynamoDB | API Gateway | EventBridge | IAM | boto3

Built a serverless tool to analyze EC2 and EBS resources, detect cost-saving opportunities, store recommendations in DynamoDB, and expose them through API Gateway.

- **Jenkins CI/CD Pipeline with Docker and AWS ECS**

[Demo](#)

Jenkins | GitHub | Maven | SonarQube | Docker | Amazon ECR | Amazon ECS | Trivy | Slack

Built a Jenkins CI/CD pipeline to build, test, scan, containerize, push Docker images to Amazon ECR, deploy to AWS ECS, and send Slack notifications.

- **AWS VProfile Deployment – End-to-End Scalable Architecture**

[Demo](#)

AWS EC2 | Auto Scaling Group | Launch Template | AMI | Application Load Balancer | Route 53 | ACM | S3 | IAM

Deployed the VProfile application on AWS using EC2, Auto Scaling, ALB, Route 53, ACM, S3, IAM, and separated backend services for a scalable multi-tier architecture.

- **VProfile Application Deployment on Kubernetes using kOps**

[GitHub](#) [Demo](#)

kOps | AWS | Kubernetes | Docker | DockerHub | Route 53 | Ingress | Amazon EBS | PVC | Secrets

Deployed the vProfile multi-tier application on a kOps-provisioned Kubernetes cluster using Pods, Services, Ingress, PVC, Amazon EBS, Secrets, and Route 53.

OPEN SOURCE CONTRIBUTIONS

- **MiroTalk – Bug Fix:** Identified and fixed a bug in the open-source MiroTalk project. [PR Link](#)
- **MiroTalk – Feature Implementation:** Added delete button functionality. [PR Link](#)

RESEARCH PUBLICATIONS

- **A Review and Comparative Analysis of Deep Learning Techniques for Plastic Classification Using Near-Infrared Spectral Data**
Published in Jayewardenenpura Computing Symposium (JCoS 2026)
- **Deep Learning-Based Multimodal Fusion of FTIR and NIR Spectral Data for IoT-Assisted Plastic Waste Classification**
Final Year Research Project (Ongoing)

SKILLS

- **Cloud & DevOps:** AWS (EC2, S3, VPC, IAM, DynamoDB, Lambda, EKS, ECS), Jenkins, Ansible, Kubernetes, Terraform, Docker, Git, Infrastructure as Code, Prometheus, Grafana, GitHub Actions, Linux Administration, Bash Scripting, Containerization, Kubernetes, Networking, Serverless Architecture, Monitoring & Observability
- **Programming:** Python, JavaScript, Node.js, React

EXTRA-CURRICULAR ACTIVITIES

- **Microsoft Student Ambassador – Associate Level**
- **Media & Communication Lead – AWS Student Builder Group at USJ**
- **n8n Community Contributor**
